		<p>3) Archaeological watching brief at the open cut area due to the significant archaeological findings of Song-Yuan period in the launching shaft area.</p>	<p>An AAB special meeting on the conservation plan for the archaeological features discovered at the To Kwa Wan (TKW) station works site (including those discovered in the launching shaft area) was held on 20 November 2014. At the AAB meeting on 4 December 2014, it was agreed that the archaeological features unearthed at the T1 Area including Well J1 and the building foundation would be preserved <i>in-situ</i>.</p> <p>Find-processing is being conducted and the final report is under preparation.</p> <p>3) Archaeological watching brief at the open cut area</p> <p>The archaeological watching brief commenced on 26 April 2014.</p> <p>The progress of the archaeological work was reported at a special meeting for AAB members on 29 May 2014, and the AAB meetings on 4 June 2014 and 16 September 2014.</p> <p>Five briefs on the progress and discoveries</p>

Ref.	Licensee	Project	Progress
			<p>of the archaeological work were circulated to AAB members on 12 June 2014, 15 July 2014, 18 August 2014, 15 September 2014 and 15 October 2014 respectively. A site visit for AAB members was arranged on 21 July 2014 to update members on the latest findings.</p> <p>Archaeological deposits in relation to the living features already identified in the T1 Area were also unearthed at the ventilation area and the Adit C area. Other archaeological features include remnants of other building structures, a water channel of early 20th century, a brickwork structure, a well of late Qing period, a pit with wooden structure, etc. Boundary of the former Sacred Hill and the nullah built during the Japanese Occupation were also identified.</p> <p>Fieldwork was completed in September 2014. Find-processing is being conducted and the final report is under preparation.</p> <p>On 20 November 2014, an AAB special meeting was held to discuss the conservation plan for the archaeological features discovered during the</p>

			<p>archaeological watching brief at the launching shaft and open cut areas of the TKW station works site. Subsequently, a site visit for AAB Members was arranged on 26 November 2014. At the AAB meeting on 4 December 2014, it was agreed that most of the above-mentioned archaeological features including the living features at the ventilation shaft and Adit C areas would be preserved <i>in-situ</i>; while Well J2 and the associated water channel would be dissembled by hand for future reconstruction. A brief on the conservation plan for the archaeological features discovered at the construction works area of the TKW Station was issued to AAB members on 17 December 2014.</p> <p>The dismantling works of Well J2 and its water channel are expected to be completed by end February 2015.</p> <p>AMO will closely monitor the implementation of the conservation plan and report to the AAB if there is any update on this project.</p>
AAB/43/2011-12	Mr Wang Fei	To conduct an archaeological watching brief to	Fieldwork was completed in September 2013.

	(王飛先生)	monitor the excavation works for the proposed holiday camp development at Pui O, Lantau Island. The implementation of the archaeological watching brief is one of the approval conditions of the planning application (No. A/SLC/88) under section 16 of the Town Planning Ordinance (Cap. 131).	No archaeological remain was identified. The final report is under preparation.
AAB/6/2013-14	Mr Wang Hong (王宏先生)	<p>To conduct an archaeological survey-cum-excavation at the former Tai Hom Village for the SCL project. The construction of the Diamond Hill Station and associated structures at the former Tai Hom Village initiated by the MTRCL is a designated project under the EIA Ordinance. The EIA report approved in 2012 recommended conducting an archaeological survey cum excavation at the former Tai Hom Village prior to commencement of construction works.</p> <p>Web link of the relevant chapter of the EIA report:</p> <ul style="list-style-type: none"> • http://www.epd.gov.hk/eia/register/report/eiareport/eia_2002011/EIA/pdf/25445_Section%204_Cultural_Heritage.pdf 	Fieldwork was completed in September 2013. No significant archaeological finding was discovered. The final report is under the preparation.
AAB/14/2013-14	Mr Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological impact assessment (AIA) at various lots in D.D. 132, Tuen Mun	Fieldwork was completed in August 2014. No archaeological remain was discovered.

Ref.	Licensee	Project	Progress
		Area 54 for a private residential development project. The AIA is a condition required by the AMO for the proposed residential development. The fieldwork aims at identifying the archaeological potential of the private lots.	The final report was completed in early November 2014.
AAB/14/2013-14	Dr William Jeffery	To conduct a Marine Archaeological Investigation (MAI) of seabed off Town Island at Sai Kung, Hong Kong. The proposed MAI is a continuation of the Surveying and Documenting the Underwater Heritage of Hong Kong – Stage 1 research project led by the applicant and funded by the Lord Wilson Heritage Trust in 2009 and 2010. From the result of this project, a small bay off the Town Island was found to contain hundreds of ceramic artefacts. Some of them can be dated back to the mid-17 th century. The proposed MAI aims at carrying out an in-depth survey at the small bay to recover and document the artefacts there.	Fieldwork was completed in July 2014. No shipwreck was discovered. Ceramic sherds of Qing dynasty to the modern period were discovered. The report is under preparation.
AAB/18/2013-14	Ms Ellen Ann Cameron	To conduct an archaeological watching brief at Lung A Pai for the Lam Tsuen Valley Sewerage. The project is initiated by Drainage Services Department (DSD). The Environmental Study Report prepared by DSD in 2011 recommended that an archaeological watching brief is required to be carried out at the works area in Lung A Pai	Fieldwork was completed in July 2014. No significant archaeological finding was discovered. The final report was completed in mid-December 2014 and had been uploaded onto AMO's website at:

Ref.	Licensee	Project	Progress
		during the construction phase to oversee the excavation works.	http://www.amo.gov.hk/form/LAP.AWB_report_v.3.pdf
AAB/18/2013-14	Dr Zheng Junlei (鄭君雷博士)	To conduct an archaeological watching brief at San Tsuen and Nga Yiu Tau for Pak Hok Lam Trunk Sewer and Sha Tau Kok Village Sewerage. The proposed sewerage works is part of the North District Sewerage Stage 2 (Remainder) and Sewerage to Chuen Lung, Kau Wa Keng Old Village and Lo Wai initiated by DSD. The Preliminary Environmental Review report recommended that an archaeological watching brief should be carried out in the proposed sewerage works areas with archaeological potential in San Tsuen and Nga Yiu Tau during the construction phase to oversee the excavation works.	The licence has expired. A new licence application will be submitted to the AMO according to the schedule of the fieldwork.
AAB/20/2013-14	Ms Liu Mao (劉茂女士)	To conduct an archaeological watching brief for Replacement and Rehabilitation of Water Mains Stage 4 Phase 2 — Mains on Outlying Islands. This project is initiated by Water Supplies Department (WSD) to replace and rehabilitate the aged water mains on outlying islands. The Final Environmental Review Report, which was issued in 2010, recommended that an archaeological watching brief should be carried out during the	The licence has expired. An application for renewal of the licence will be submitted to the AMO to tie in with the construction schedule.

Ref.	Licensee	Project	Progress
		construction phase to oversee the excavation works for the alignments within or in close proximity to Lo So Shing, Peng Chau and Pui O Sites of Archaeological Interest.	
AAB/20/2013-14	Mr Markus Spring	To conduct an archaeological survey for Tung Chung New Town Development Extension. This project, initiated by Civil Engineering and Development Department (CEDD), is a designated project under the EIA Ordinance. The survey aims at obtaining necessary field data to assess the archaeological potential within the potential development areas in Tung Chung and the result will form part of the EIA report.	Fieldwork was completed in July 2014. Fragments of vessels including two bowls of Tang dynasty, a celadon bowl of Song dynasty to Yuan dynasty, glazed pottery sherds of Song dynasty to Ming dynasty and ceramic remains of Tang dynasty to Qing dynasty were identified. The final report is under preparation.
AAB/31/2013-14	Ms Julie Van Den Bergh	To conduct an archaeological survey at Sandy Ridge for Site Formation and Associated Infrastructural Works for Development of Columbarium, Crematorium and Related Facilities at Sandy Ridge Cemetery, which is initiated by the CEDD and is a designated project under the EIA Ordinance. The archaeological survey aims at assessing the archaeological impact of the proposed works for the EIA.	Fieldwork was completed in May 2014 with the discovery of a cultural layer. Upon the finalisation of the archaeological report, the EIA report will be updated accordingly.
AAB/31/2013-14	Ms Liu Mao (劉茂女士)	To conduct an archaeological watching brief for the Replacement and Rehabilitation of Water Mains, Stage 3, Mains in West Kowloon	Fieldwork is underway to tie in with the construction schedule.

Ref.	Licensee	Project	Progress
		(Package B) project which is initiated by WSD. According to the cultural heritage study report of the project issued in 2009, it was recommended that an archaeological watching brief should be carried out to oversee the construction works for the water mains alignments in the vicinity of the areas where cultural remains of Han dynasty were discovered in Mong Kok in 2004.	
AAB/31/2013-14	Mr Wang Fei (王飛先生)	To conduct an archaeological survey at Sha Tau Kok Road Section and Lau Shui Heung Tunnel Section as well as an archaeological watching brief at Fanling Section for Liantang/Heung Yuen Wai Boundary Control Point and Associated Works Project, which is initiated by CEDD and is a designated project under the EIA Ordinance. The approved EIA report in 2011 recommended that further archaeological survey should be conducted at the works areas within the aforesaid sections to verify the EIA findings. Based on the archaeological action plan (AAP) in 2014, an archaeological survey is recommended to be carried out at the works areas in Sha Tau Kok Road Section and Lau Shui Heung Tunnel Section; and an archaeological watching brief is recommended to be carried out at the works area in Fanling Section.	Fieldwork was completed in June 2014. No significant archaeological remain was discovered. The final report is under preparation.

Ref.	Licensee	Project	Progress
AAB/31/2013-14	Mr Wang Fei (王飛先生)	To conduct an AIA for the proposed development of an extension central block and construction of new underground utilities at Royal Hong Kong Yacht Club (RHKYC), Kellett Island, Hong Kong. As the proposed works fall within the boundary of the Kellett Island Site of Archaeological Interest, the RHKYC is required to conduct the AIA to assess the impact on the site arising from the proposed works.	Fieldwork was originally completed in May 2014. Since additional landscaping works were required in the east of the RHKYC building, two test pits were excavated in September 2014 to obtain more archaeological data. No archaeological remain was discovered. The final report is under preparation.
AAB/37/2013-14	Ms Liu Mao (劉茂女士)	To conduct an archaeological watching brief for the Sewerage at Yuen Long Kau Hui and Shap Pat Heung (Sewerage Works at Portion B - Tai Tong Tsuen) project, which is initiated by DSD. According to the final environmental study report of the project issued in 2008, an archaeological watching brief should be carried out during the construction phase to oversee the excavation works in Tai Tong Tsuen, Yuen Long.	Fieldwork is underway to tie in with the construction schedule.
AAB/38/2013-14	Ms Julie Van Den Bergh	To conduct an archaeological watching brief for the Sewerage Works at Wang Tong Village under the Upgrading of Mui Wo Sewage Treatment Works and Village Sewerage at Wang Tong and Yue Kown Chuen, Lantau Island project, which is initiated by DSD. The Cultural Heritage Impact Assessment report prepared by DSD in 2009 recommended that an	Fieldwork is underway to tie in with the construction schedule.

Ref.	Licensee	Project	Progress
		archaeological watching brief should be carried out during the construction phase to oversee the excavation works at Wang Tong village.	
AAB/38/2013-14	Ms Julie Van Den Bergh	To conduct an archaeological watching brief and rescue excavation for the proposed development at Lots 196 and 197 S.A.ss.1 in D.D. Cheung Chau. It is stipulated in the approval for the concerned planning application (No. A/I-CC/18) under section 16 of the Town Planning Ordinance (Cap. 131) that an AAP should be submitted and mitigation measures should be implemented in accordance with the approved AAP. According to the approved AAP, an archaeological watching brief should be conducted to monitor the excavation works at the former Cheung Chau Theatre and the tree planting areas; and to carry out rescue excavation in the areas for shops, eateries, associated facilities and landscaping to retrieve archaeological data and cultural remains.	Fieldwork has yet to commence. As informed by the project proponent in late December 2014, a new licence application will be submitted to the AMO when the appointment of a new archaeological team is confirmed.
AAB/38/2013-14	Ms Sarah Heaver	To conduct a MAI for the Planning and Engineering Study on Future Land Use at Ex-Lamma Quarry Area at Sok Kwu Wan, Lamma Island – Feasibility Study project, which is initiated by CEDD. It is a designated project under the EIA Ordinance. The geophysical survey of the project identified seabed anomalies	Diver survey is underway.

Ref.	Licensee	Project	Progress
		to be affected by the proposed works. The MAI aims at verifying the nature of these anomalies and the result will form part of the EIA report.	
AAB/43/2013-14	Professor Patrick Wu Pak Cheuk (胡百卓教授)	To excavate and search for fossils in areas of sedimentary rocks within Hong Kong on behalf of the Department of Earth Sciences of the University of Hong Kong for teaching and research purposes.	Fieldwork schedule to be confirmed.
AAB/43/2013-14	Dr Michael Atha	To conduct an archaeological survey-cum-excavation at Pak Kok Tsui, Lamma Island for the Hong Kong Archaeological Society which is a research project subvented by the Government. It aims at identifying the archaeological resources at Pak Kok Tsui, Lamma Island. The research findings could be further used as a reference for understanding archaeological sites of similar nature in Hong Kong.	Fieldwork was completed on 30 November 2014 and a progress report was submitted to the AMO in late December 2014. A corded coarse pottery sherd, a stone arrowhead and a soft geometric pottery sherd of Late Neolithic period were discovered. The final report is under preparation.
AAB/43/2013-14	Mr Ng Wai Hung (吳偉鴻先生)	To conduct an AIA for the proposed construction of a shelter at the open space next to the South Lantau Rural Committee Office at Pui O, Lantau Island which is initiated by the Home Affairs Department (HAD). As the proposed works fall within the boundary of the Pui O Site of Archaeological Interest, HAD is required to	Fieldwork schedule to be confirmed.

Ref.	Licensee	Project	Progress
		conduct archaeological work to ascertain the archaeological potential of the works areas.	
AAB/43/2013-14	Mr Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological survey for the Formation, Roads and Drains in Area 54, Tuen Mun – Phase 1 and Phase 2 project, which is initiated by CEDD. The EIA report of Planning and Development Study of Potential Housing Site in Area 54, Tuen Mun was approved by the Environmental Protection Department in 1999. According to the EIA review report prepared by CEDD in 2011, it is recommended that further archaeological survey should be conducted to obtain more information to verify the archaeological potential of the concerned areas in Area 54, Tuen Mun and formulate appropriate mitigation measures prior to the construction phase of the project.	Fieldwork commenced on 12 December 2014. No significant archaeological remain was discovered. An interim report in draft form was submitted to the AMO in mid-January 2015.
AAB/51/2013-14	Mr Wang Wenjian (王文健先生)	To conduct an archaeological survey for the Hung Shui Kiu New Development Area, Planning and Engineering Study – Investigation. The project is initiated by CEDD which is a designated project under the EIA Ordinance. The proposed archaeological survey aims at obtaining field data to ascertain the archaeological potential of the study area for subsequent impact assessment. The result of	Fieldwork is underway.

Ref.	Licensee	Project	Progress
		the archaeological survey will form part of the EIA report.	
AAB/51/2013-14	Mr Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological investigation for the proposed infrastructure works at the former North Apron area, which is initiated by CEDD for serving the development sites at the former North Apron area at the former Kai Tak Airport.	Fieldwork schedule to be confirmed.
AAB/51/2013-14	Mr Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological survey for the proposed site for public housing development at the Queen's Hill Site of Archaeological Interest, Fanling, which is initiated by the Housing Department. As the proposed development partly falls within the Queen's Hill Site of Archaeological Interest, a desktop review of the archaeological study recommended that an archaeological survey should be conducted at the two affected areas within the Site of Archaeological Interest first, while an archaeological survey for the other three areas of archaeological potential within the project boundary should be conducted separately in order to assess the archaeological impact of the proposed development.	Fieldwork schedule to be confirmed.
