			<p>to Members on 12 June 2014, 15 July 2014, 18 August 2014, 15 September 2014 and 15 October 2014 respectively. A site visit was arranged on 21 July 2014 to update Members on the latest findings.</p> <p>Archaeological deposits in relation to the living features already identified in the T1 Area were also unearthed at the ventilation area and the Adit C area. Other archaeological features include remnants of other building structures, a water channel of early 20th century, a brickwork structure, a well of late Qing period, a pit with wooden structure, etc. Boundary of the former Sacred Hill and the nullah built during the Japanese Occupation were also identified.</p> <p>Fieldwork was completed in September 2014. Find-processing is being conducted and the final report is under preparation.</p> <p>On 20 November 2014, a special Board meeting was held to discuss the conservation plan for the archaeological features discovered during the AWB at the launching shaft and open cut areas of the To Kwa Wan Station works site.</p>

Ref.	Licensee	Project	Progress
			<p>Subsequently, a site visit for Members was arranged on 26 November 2014. At the Board meeting on 4 December 2014, it was agreed that most of the above-mentioned archaeological features including the living features at the ventilation shaft and Adit C areas would be preserved <i>in-situ</i>; while Well J2 and the associated water channel would be dissembled by hand for future reconstruction. A brief on the conservation plan for the archaeological features discovered at the construction works area of the To Kwa Wan Station was issued to Members on 17 December 2014.</p> <p>The dismantling works of Well J2 and its water channel were completed in March 2015.</p> <p>The draft report including the archaeological work of Phase II and Phase III was submitted to AMO in April 2015. Two meetings were held to discuss the structure of the final report. Volume I of the final report was submitted to AMO in February 2016.</p>

Ref.	Licensee	Project	Progress
		4) Backfilling as part of conservation measures for the archaeological features unearthed and archaeological work for tentative small-scale excavation works.	<p>4) Backfilling and archaeological work</p> <p>The backfilling of archeological features to be preserved <i>in-situ</i> was completed in early May 2015.</p> <p>As no construction works have been conducted in the area of archaeological potential, archaeological work has not been conducted under this licence so far.</p>
AAB/43/2011-12	Mr Wang Fei (王飛先生)	To conduct an AWB to monitor the excavation works for the proposed holiday camp development at Pui O, Lantau Island. The implementation of the AWB is one of the approval conditions of the planning application (No. A/SLC/88) under section 16 of the Town Planning Ordinance (Cap. 131).	Fieldwork was completed in September 2013. No archaeological remain was identified. The final report is under preparation.
AAB/6/2013-14	Mr Wang Hong (王宏先生)	To conduct an archaeological survey-cum-excavation at the former Tai Hom Village for the SCL project. The construction of the Diamond Hill Station and associated structures at the former Tai Hom Village initiated by MTRCL is a designated project under the EIA Ordinance (Cap. 499). The EIA report approved in 2012 recommended the conducting of an archaeological survey-cum-excavation at the	Fieldwork was completed in September 2013. No significant archaeological finding was discovered. The final report in draft format was submitted to AMO in April 2015. Comments of AMO were given in December 2015. Parts of the revised draft report were submitted to AMO in February and March 2016 respectively.

		<p>former Tai Hom Village prior to commencement of construction works.</p> <p>Web link of the relevant chapter of the EIA report:</p> <ul style="list-style-type: none"> • http://www.epd.gov.hk/eia/register/report/eiareport/eia_2002011/EIA/pdf/25445_Section%204_Cultural_Heritage.pdf 	
AAB/14/2013-14	Dr William Jeffery	<p>To conduct a Marine Archaeological Investigation (MAI) of seabed off Town Island at Sai Kung, New Territories. The proposed MAI is a continuation of the Surveying and Documenting the Underwater Heritage of Hong Kong – Stage 1 research project led by the applicant and funded by the Lord Wilson Heritage Trust in 2009 and 2010. From the result of this project, a small bay off the Town Island was found to contain hundreds of ceramic artefacts. Some of them can be dated back to the mid-17th century. The proposed MAI aims at carrying out an in-depth survey at the small bay to recover and document the artefacts there.</p>	<p>Fieldwork was completed in July 2014. No shipwreck was discovered. Ceramic sherds of Qing dynasty to the modern period were discovered. The report is under preparation.</p>
AAB/31/2013-14	Mr Wang Fei (王飛先生)	<p>To conduct an archaeological survey at Sha Tau Kok Road Section and Lau Shui Heung Tunnel Section as well as an AWB at Fanling Section for Liantang/Heung Yuen Wai Boundary Control</p>	<p>Fieldwork was completed in June 2014. No significant archaeological remain was identified. The final report is under preparation.</p>

Ref.	Licensee	Project	Progress
		<p>Point and Associated Works Project, which is initiated by the Civil Engineering and Development Department (CEDD) and is a designated project under the EIA Ordinance (Cap. 499). The EIA report approved in 2011 recommended that further archaeological survey should be conducted at the works areas within the aforesaid sections to verify the EIA findings. Based on the Archaeological Action Plan (AAP) approved in 2014, an archaeological survey is recommended to be carried out at the works areas in Sha Tau Kok Road Section and Lau Shui Heung Tunnel Section; and an AWB for the works area in Fanling Section.</p>	
AAB/38/2013-14	Ms Sarah Heaver	<p>To conduct a MAI for the Planning and Engineering Study on Future Land Use at Ex-Lamma Quarry Area at Sok Kwu Wan, Lamma Island – Feasibility Study project, which is initiated by CEDD. It is a designated project under the EIA Ordinance (Cap. 499). The geophysical survey of the project identified seabed anomalies to be affected by the proposed works. The MAI aims at verifying the nature of these anomalies and the result will form part of the EIA report.</p>	<p>Diver survey was completed in January 2015. No archaeological remain was identified. The MAI report is under preparation.</p>

Ref.	Licensee	Project	Progress
AAB/43/2013-14	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct an Archaeological Impact Assessment (AIA) for the proposed construction of a shelter at the open space next to the South Lantau Rural Committee Office at Pui O, Lantau Island, which is initiated by the Home Affairs Department (HAD). As the proposed works fall within the boundary of the Pui O Site of Archaeological Interest, HAD is required to conduct archaeological work to ascertain the archaeological potential of the works areas.	Fieldwork was completed in October 2015. No archaeological remain was identified. The final report is under preparation.
AAB/43/2013-14	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological survey for the Formation, Roads and Drains in Area 54, Tuen Mun – Phase 1 and Phase 2 project, which is initiated by CEDD. The EIA report of Planning and Development Study of Potential Housing Site in Area 54, Tuen Mun was approved by the Environmental Protection Department in 1999. According to the EIA review report prepared by CEDD in 2011, it is recommended that further archaeological survey should be conducted to obtain more information to verify the archaeological potential of the concerned areas in Area 54, Tuen Mun and formulate appropriate mitigation measures prior to the construction phase of the project.	Fieldwork was completed in November 2015. No significant archaeological remain was identified. The final report is under preparation.

Ref.	Licensee	Project	Progress
AAB/51/2013-14	Mr Wang Wenjian (王文建先生)	To conduct an archaeological survey for the Hung Shui Kiu New Development Area, Planning and Engineering Study – Investigation. The project is initiated by CEDD which is a designated project under the EIA Ordinance (Cap. 499). The proposed archaeological survey aims at obtaining field data to ascertain the archaeological potential of the study area for subsequent impact assessment. The result of the archaeological survey will form part of the EIA report.	Fieldwork was completed in March 2015. No significant archaeological remain was identified. The final report is under preparation.
AAB/51/2013-14	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct the first phase (Stage 5A) of archaeological investigation for the proposed infrastructure works at the former North Apron area, which is initiated by CEDD, for serving the development sites at the former North Apron area at the former Kai Tak Airport.	Fieldwork was completed in August 2015. Building remains from the early 20 th century were found, including remnants of stone walls, bricks walls, concrete and tiled floor along with ceramic sherds. The final report is under preparation.
AAB/51/2013-14	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological survey for the proposed site for public housing development at the Queen's Hill Site of Archaeological Interest, Fanling, which is initiated by the Housing Department. As the proposed development partly falls within the Queen's Hill Site of Archaeological Interest, a desktop review of the archaeological study recommended that an archaeological survey should be conducted at the	Fieldwork was completed in March 2015. No archaeological remain was identified. The final report is under preparation.

Ref.	Licensee	Project	Progress
		two affected areas within the Site of Archaeological Interest first, while an archaeological survey for the other three areas of archaeological potential within the project boundary should be conducted separately in order to assess the archaeological impact of the proposed development.	
AAB/5/2015-16	Ms Ellen Ann Cameron	To conduct an AIA for the Nga Tsin Wai Village redevelopment project, which is initiated by the Urban Renewal Authority (URA). To balance the need of redevelopment and conservation, the URA commissioned conservation experts in 2006 to carry out a conservation study for the project. Based on the findings of the ground penetrating radar survey conducted on site, the final conservation report issued in 2009 recommended that further investigation and archaeological excavation should be conducted to verify the results of the radar survey. As such, Ms Cameron is commissioned to conduct an archaeological field survey in order to obtain field data to ascertain the archaeological potential of the village for subsequent impact assessment and formulate appropriate mitigation measures prior to the construction phase of the project.	Fieldwork commenced in March 2016 and is still underway.

Ref.	Licensee	Project	Progress
AAB/11/2015-16	Mr Ng Chun Nam (吳震霖先生)	To conduct an AWB at San Tsuen and Nga Yiu Tau for Pak Hok Lam Trunk Sewer and Sha Tau Kok Village Sewerage, which is part of the North District Sewerage Stage 2 (remainder) and sewerage to Chuen Lung, Kau Wa Keng Old Village and Lo Wai initiated by the Drainage Services Department (DSD). A final Preliminary Environmental Review (PER) report was completed in 2010 during the investigation phase of the project. The PER report recommended that AWB should be carried out in the proposed sewerage works areas of archaeological potential in San Tsuen and Nga Yiu Tau during the construction phase to oversee the excavation works. A licence was granted on 24 October 2013 for this AWB but the construction works had been postponed. This is a new licence granted according to the new schedule of fieldwork.	Fieldwork commenced on 10 November 2015 and is still underway to tie in with the construction schedule.
AAB/11/2015-16	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological investigation and survey-cum-excavation at various lots of D.D. 244 in Nam Pin Wai, Sai Kung for a residential development project within the Ho Chung Site of Archaeological Interest. The archaeological work is a condition required by AMO for the proposed residential development. The proposed fieldwork aims to investigate the	Fieldwork was completed in October 2015. Stone tools of Late Neolithic period and ceramics of Song to Qing dynasties were unearthed. The final report is under preparation.

Ref.	Licensee	Project	Progress
		archaeological potential of the study area and undertake rescue excavation to preserve the archaeological deposits in part of the site identified in an archaeological investigation in 2007 before commencement of the construction works.	
AAB/11/2015-16	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological investigation for the proposed Stage 5B infrastructure works at the former North Apron Area. The area covers the proposed Stage 5B infrastructure works, which is initiated by CEDD, for serving the development sites at the former North Apron Area of the former Kai Tak Airport. The project area locates in the vicinity of the construction works site of To Kwa Wan Station of the SCL where significant archaeological findings were yielded in the archaeological work taken place recently. Archaeological review commissioned by CEDD recommended conducting archaeological investigation by phases so as to ascertain the archaeological potential within the footprint of the project area.	Fieldwork was completed in December 2015. Pottery sherds dated to Song-Yuan period as well as archaeological remains of the early 20 th century were identified. The final report is under preparation.
AAB/11/2015-16	Mr Wang Hong (王宏先生)	To conduct an archaeological rescue excavation and an AWB at Ha Wun Yiu Village for Tolo Harbour sewerage of unsewered area. Based on the final AIA report issued in 2009, AWB for all	AWB commenced in January 2016. Ceramic sherds of Qing period were found. AWB is underway to tie in with the construction schedule.

Ref.	Licensee	Project	Progress
		impacted areas that fall within the Wun Yiu Site of Archaeological Interest was recommended during the construction phrase. Further evaluation was conducted according to the updated detailed design in 2012. Rescue excavation at some works areas with significant archaeological potential is also required in addition to the AWB.	Rescue excavation for areas concerned has not commenced and the schedule is to be confirmed.
AAB/11/2015-16	Ms Sarah Heaven	To conduct marine archaeological work in relation to the relocation of the metal object for Wan Chai Development Phase II. A large metal object was found 6 metres underneath the seabed during the construction works for the reclamation project. After preliminary AIA, CEDD recommended marine archaeological work to be conducted during the relocation of the metal object. The purpose of the marine archaeological work is to ensure that as much archaeological information and evidence as possible can be retrieved from the site so as to formulate appropriate mitigation measures in a timely manner.	The metal object was relocated underwater to a nearby seabed area under the monitoring of the archaeologist in June 2015. The final report is under preparation. The next phase of investigation is being considered by CEDD.
AAB/12/2015-16	Ms Julie Van Den Bergh	To conduct an AWB for the Sewerage Works at Wang Tong Village under the Upgrading of Mui Wo Sewage Treatment Works and Village Sewerage at Wang Tong and Yue Kwong Chuen,	Fieldwork commenced in February 2016 and is still underway to tie in with the construction schedule.

Ref.	Licensee	Project	Progress
		Lantau Island project, which is initiated by DSD. The Cultural Heritage Impact Assessment Report of the project prepared in 2009 recommended that an AWB should be carried out during the construction phase to oversee the excavation works at Wang Tong Village.	
AAB/12/2015-16	Ms Liu Mao (劉茂女士)	To conduct an AWB for the Replacement and Rehabilitation of Water Mains, Stage 3, Mains in West Kowloon (Package B) project, which is initiated by the Water Supplies Department. According to the Cultural Heritage Study Report of the project issued in 2009, it was recommended that an AWB should be carried out during the construction phase to oversee the excavation works to be conducted in the vicinity of the areas where cultural remains of Han dynasty were discovered in Mong Kok in 2004.	Fieldwork schedule to be confirmed.
AAB/12/2015-16	Ms Sarah Heaver	To conduct a MAI for the Asia-Africa-Europe-1 Cable System at Cape D'Aguilar project, which is initiated by NEC Corporation and is a designated project under the EIA Ordinance (Cap. 499). The geophysical survey of the project identified a seabed anomaly within 50 metres from the proposed route alignment to be affected by the installation of a submarine telecommunication cable system linking Hong	Diver inspection was completed on 29 August 2015. No archaeological remain was identified. The MAI report is under preparation.

Ref.	Licensee	Project	Progress
		Kong to Thailand. The baseline review of the project indicated that there is archaeological potential on the seabed in the Lap Sap Wan. The proposed MAI will conduct diver inspection to assess the archaeological potential of the anomaly as well as the seabed in Lap Sap Wan bay.	
AAB/12/2015-16	Dr William Jeffery	To conduct a marine archaeological survey and excavation of an anchor stock site on the southern tip of High Island and a Basalt Island cannon site on behalf of Hong Kong Maritime Museum. The purposes of the marine archaeological work are to recover and conserve an anchor stock and two cannons as well as to record and document all the other discovered archaeological materials, including the ceramics, in their vicinity. The licensee will conduct research on the date and provenance of the materials to recommend the follow-up measures in the report.	The survey commenced on 1 November 2015 and is still underway.
AAB/13/2015-16	Dr Liu Wensuo (劉文鎖博士)	To conduct an archaeological survey for the Liantang/Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works (Contract 6), which is initiated by CEDD. The project area of the current Contract 6 falls within the five areas of archaeological potential identified in the approved EIA Report in 2011.	Fieldwork was completed on 23 September 2015. No significant archaeological remain was identified. The final report is under preparation.

Ref.	Licensee	Project	Progress
		The archaeological survey aims at assembling field data to verify the archaeological potential of the five areas for subsequent impact assessment and recommend appropriate mitigation measures if necessary.	
AAB/13/2015-16	Ms Sarah Hever	To conduct diver inspection for a MAI for the Preliminary Integrated Development Study on Reclamation in Association with Relocation of Sai Kung Sewage Treatment Works, which is initiated by the CEDD. A geophysical survey conducted in March and April 2015 indicated fourteen sonar contacts on the seabed, ten of which would be impacted directly or indirectly by the proposed works. A diver inspection which forms part of the MAI was, therefore, recommended to assess the archaeological value of the ten anomalies of the impacted area and to formulate a mitigation strategy if necessary.	Diver inspection was completed in November 2015. No archaeological remain was identified. The MAI report is under preparation.
AAB/19/2015-16	Professor Patrick Wu Pak Cheuk (胡百卓教授)	To excavate and search for fossils in the areas of sedimentary rocks and soils within Hong Kong on behalf of the Department of Earth Sciences of the University of Hong Kong for teaching and research purposes.	Fieldwork schedule to be confirmed.
AAB/19/2015-16	Mr Steven Ng Wai Hung	To conduct an archaeological investigation on Tung Lung Chau, Sai Kung for the Hong Kong	Fieldwork was completed in January 2016. No significant archaeological remain was

Ref.	Licensee	Project	Progress
	(吳偉鴻先生)	Archaeological Society (HKAS) which is a research project with financial support from the Government. It aims to ascertain the archaeological significance of North Tung Lung Chau. Members of HKAS will take part in the proposed archaeological work.	identified. The final report is under preparation.
AAB/19/2015-16	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct Stage 2B archaeological survey for the Infrastructural Works for Proposed Developments at Queen's Hill, Fanling – Investigation, Design and Construction, which is initiated by CEDD to review the feasibility of providing necessary infrastructure works to support the proposed housing development at Queen's Hill, Fanling. As the Queen's Hill Site of Archaeological Interest will be affected by the proposed housing development, a desktop review of the Stage 1 Archaeological Study commissioned by CEDD recommended to conduct a Stage 2A archaeological survey at the Potential Areas 1 and 2 within the Site of Archaeological Interest (survey completed in May 2015) and a Stage 2B archaeological survey at the Entrance Area, Large Grass Field and Ball Court of Queen's Hill within the project boundary to assess the archaeological impact of the proposed housing development.	Fieldwork was completed on 30 December 2015. No archaeological remain was identified. The final report is under preparation.

Ref.	Licensee	Project	Progress
AAB/19/2015-16	Mr Wang Fei (王飛先生)	To conduct an AWB for the proposed construction of a canopy at the Royal Hong Kong Yacht Club (RHKYC), Kellett Island, Hong Kong. To ascertain whether the proposed development at the RHKYC would cause adverse impact on the Kellett Island Site of Archaeological Interest where the RHKYC is situated, an assessment was conducted in 2014 to evaluate the archaeological impact imposed by the proposed works. Based on the archaeological impact assessment report issued in 2015, an AWB was recommended as mitigation measures for the construction of a canopy at the west side of the RHKYC building.	Fieldwork schedule to be confirmed.
AAB/19/2015-16	Dr Guo Lixin (郭立新博士)	To conduct an archaeological rescue excavation and watching brief for the sewerage works at Yung Shue Wan Site of Archaeological Interest, Lamma Island under the Outlying Islands Sewerage Stage 2 – Lamma Village Sewerage Phase 2, Package 1 project, which is initiated by DSD. Based on the PER Report of the project issued in 2010, an AWB was recommended for some works areas at Yung Shue Wan Back Street, Sha Po New Village and Yung Shue Long New Village during the construction phase of the project while rescue excavation was proposed for some other works areas at Yung Shue Wan Back	Fieldwork schedule to be confirmed.

Ref.	Licensee	Project	Progress
		Street with significant archaeological potential.	
AAB/19/2015-16	Mr Wang Hong (王宏先生)	To conduct an archaeological rescue excavation for the proposed development at Lots 196 and 197 S.A. ss.1 in D.D. Cheung Chau, which is initiated by Wide Will Corporation Limited. It is stipulated in the approval for the concerned planning application that an AAP should be submitted to AMO and mitigation measures should be implemented in accordance with the approved AAP. Based on the baseline and impact assessment studies, the AAP recommends carrying out an archaeological rescue excavation to retrieve archaeological data and cultural remains at the aforesaid lots prior to the commencement of any excavation works.	Fieldwork schedule to be confirmed.
AAB/20/2015-16	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological survey for the Preliminary Development Review for Housing Sites at Tuen Mun Central – Feasibility Study which is initiated by CEDD. Since the proposed housing development at Wu Shan Recreational Playground is located within the Shek Kok Tsui Site of Archaeological Interest, an archaeological survey will be carried out to assess the archaeological impact on the proposed housing development and formulate appropriate mitigation measures in prior agreement with	Fieldwork commenced in March 2016 and is still underway.

Ref.	Licensee	Project	Progress
		AMO.	
AAB/20/2015-16	Mr Steven Ng Wai Hung (吳偉鴻先生)	To conduct an archaeological investigation to ascertain the archaeological potential of the investigation area within the Nam Wai Site of Archaeological Interest in Sai Kung and formulate mitigation measures for CEDD to plan for the future use of the investigation area. The archaeological investigation is commissioned by CEDD under the Agreement No. NTE 04/2015.	Fieldwork commenced in March 2016 and is still underway.
AAB/20/2015-16	Dr Zheng Junlei (鄭君雷博士)	To conduct an AWB at Kei Lun Wai and Fu Tei Ha Tsuen for the Castle Peak Road Trunk Sewer and Tuen Mun Village Sewerage project, which is initiated by DSD. Since some of the sewerage works areas fall within the Kei Lun Wai and Fu Tei Ha Sites of Archaeological Interest, an AWB is recommended to oversee the excavation works within the sites of archaeological interest.	Fieldwork schedule to be confirmed.
AAB/25/2015-16	Ms Ellen Ann Cameron	To conduct an AIA for the Nga Tsin Wai Village redevelopment project, which is initiated by the URA. The conservation study report issued by the URA in 2009 recommended for an archaeological investigation to ascertain the archaeological potential of the Nga Tsin Wai village before development.	Fieldwork commenced in March 2016 and is still underway.

Ref.	Licensee	Project	Progress
AAB/25/2015-16	Dr Liu Wensuo (劉文鎖)	To conduct an AWB at the provisional area for the construction of To Kwa Wan Station of the Shatin to Central Link, which is initiated by the MTRCL to ensure that any further potential or suspected archaeological deposits identified during construction can be properly addressed.	Fieldwork schedule to be confirmed.
AAB/25/2015-16	Ms Kennis Yip Ho Sze (葉可詩)	To conduct an AIA for the proposed development at the Northern Lamma School, Lamma Island, which is initiated by the Education Bureau for building a new annex block, and demolishing the temporary structures and an existing building. As the proposed development is located within the Yung Shue Wan Site of Archaeological Interest, an AIA is required to obtain field archaeological data, assess the archaeological impact of the proposed development and formulate appropriate mitigation measures, if required, in prior agreement with AMO.	Fieldwork schedule to be confirmed.
