

Progress of Archaeological Projects with Licences Issued
(as at 15 May 2023)

| Ref. | Licensee | Project | Progress |
|----------------|----------------------------|--|--|
| AAB/40/2017-18 | Prof. David Parham | The Marine Archaeological Investigation (MAI) for the metal object at the seabed of Wan Chai is initiated by the Civil Engineering and Development Department (CEDD). The metal object was originally found near the ex-Wan Chai Ferry Pier and was relocated to its current location in 2015 under the monitoring of a qualified marine archaeologist. Subsequent to the relocation of the metal object, CEDD initiates a MAI to further investigate the identity and ownership of the metal object; and to establish its heritage value, if any. | Fieldwork was completed in February 2019. Comments on the draft report have been given to the licenced archaeologist. The draft report is being revised by the licenced archaeologist. |
| AAB/8/2021-22 | Dr. Lee Man Hoi (李文愷博士) | To conduct excavation and search for fossils in the areas of sedimentary rocks and soils within Hong Kong on behalf of the Department of Earth Sciences of The University of Hong Kong for teaching and research purposes. | The final report of the fieldwork is under preparation. |
| AAB/11/2021-22 | Ms Julie Van Den Bergh | To conduct an archaeological field investigation for Environmental Impact Assessment (EIA) Study for Tung Chung Line Extension initiated by MTR Corporation Limited (MTRCL). The purpose of the archaeological field investigation is to investigate the archaeological potential of the area of archaeological interest within the project area of Tung Chung West Station through additional testing | Fieldwork was completed in September 2022. The final report was agreed by the Antiquities and Monuments Office (AMO) in April 2023. |

| | | | |
|----------------|---------------------------|---|--|
| | | and assess the potential archaeological impacts. Mitigation measures will be recommended if necessary. | |
| AAB/12/2021-22 | Ms Sarah Heaver | To conduct MAI for EIA Study for Aberdeen Boat Club Middle Island Development Phases III, IV and V. The purpose of the MAI is to assess the significance of any underwater cultural heritage resources that may be impacted by the proposed marine works at Middle Island. The diver survey will provide detailed information about the archaeological value of the 141 Unknown Objects identified by the marine geophysical survey on the seabed within the study area. Appropriate mitigation measures will be recommended if necessary. | Fieldwork was completed in January 2022. No archaeological remain was identified. The MAI report is under preparation. |
| AAB/15/2021-22 | Mr Ng Chun Lam (吳震霖先生) | The archaeological survey is initiated by MTRCL to assess the feasibility for providing a passenger connection from Sung Wong Toi Station to Pak Tai Street, which likely has impact on the archaeological potential area. The archaeological survey, conducted by Dr Liu Wensuo, commenced in January 2019. Since the licence for the archaeological survey expired in December 2019, MTRCL commissioned Mr Ng Chun Lam to continue the archaeological survey. Dr Liu was appointed by MTRCL as professional advisor for the archaeological project. Mr Ng was granted a | Fieldwork was completed in April 2022. The final report is under preparation. |

| | | | |
|----------------|----------------------------|---|---|
| | | licence on 9 January 2020 to conduct the survey. The licence was renewed in January 2021 for continuing to carry out the survey when his first licence expired. As his second licence expired in January 2022, the licence was renewed in January 2022 for continuing to carry out the survey. | |
| AAB/15/2021-22 | Mr Ng Chun Lam (吳震霖先生) | To conduct an Archaeological Watching Brief (AWB) for the Elderly Home Development by Pok Oi Hospital in Lam Tei, Tuen Mun. The purpose of the AWB is to monitor and record cultural remains if discovered within the project area in the course of excavation works; and recommend appropriate mitigations measures if necessary in agreement with AMO. | Fieldwork schedule is to be confirmed. As the originally approved licence was expired, Mr Ng Chun Lam submitted an application for licence renewal to AMO in April 2023 to carry out the AWB. The new licence was granted to Mr Ng Chun Lam in May 2023. For details of the new licence, please see AAB/4/2023-24 on page 13 of this Annex. |
| AAB/16/2021-22 | Mr Wang Wenjian (王文建先生) | To conduct further archaeological survey, archaeological rescue excavation (ARE) and an AWB for Tung Chung New Town Extension – Site Formation and Infrastructure Works at Ma Wan Chung initiated by CEDD. The purpose of the archaeological works is to assess the portions of the known archaeological sites to be directly affected by the proposed works, to assess the archaeological potential of the areas near the known archaeological sites, and to identify any unknown archaeological sites to be affected by the proposed works. | Fieldwork commenced in March 2022. As the originally approved licence was expired, Mr Wang Wenjian submitted an application for licence renewal to AMO in April 2023 to carry out the archaeological works. The new licence was granted to Mr Wang Wenjian in May 2023. For details of the new licence, please see AAB/4/2023-24 on page 13 of this Annex. |

| | | | |
|----------------|---------------------------|---|--|
| | | Appropriate mitigation measures will be recommended for agreement, if necessary. | |
| AAB/16/2021-22 | Ms Julie Van Den Bergh | To conduct an AWB at Che Ha, Shap Long, Hung Shing Ye and Tai Tung for the Construction of Pressure Management and District Metering Installations under Water Intelligent Network (WIN) undertaken by the Water Supplies Department. The AWB is the recommendation for archaeological actions in the Heritage Impact Assessment (HIA) for the Implementation of WIN, Remaining District Metering Areas and Pressure Management Areas in Kowloon East, Sha Tin and Island Major Supply Zones – Investigation, Design and Construction. The AWB aims at monitoring the chamber construction excavation works at the identified locations and recording evidence of archaeological materials, features or deposits. Mitigation measures will be recommended for agreement by AMO if significant archaeological findings are discovered. | Fieldwork commenced in May 2022 and is underway. |
| AAB/20/2021-22 | Mr Ng Chun Lam (吳震霖先生) | To conduct an AWB and an archaeological excavation (AE) for the Lung Tsun Stone Bridge (LTSB) Preservation Corridor Project initiated by the Architectural Services Department. The objective of the AWB and AE is to implement the archaeological mitigation measures recommended in the HIA for LTSB Preservation Corridor Project at Kai Tak. The AWB aims at monitoring the | Fieldwork commenced in July 2022. The originally approved licence has expired. Mr Ng Chun Lam submitted an application for licence renewal in May 2023. AMO is studying the application. |

| | | removal of the backfill deposits which cover the remnants of LTSB, 1924 seawall, 1933 causeway and the former Kowloon City Pier within the future display area as well as the removal of the concrete remains of the former Hong Kong International Airport Passenger Terminal Building, while the AE will be conducted to re-investigate the above-mentioned remnants after the removal of the backfill deposits and to record their condition / state of preservation. The AWB and AE will be conducted to facilitate the construction of the LTSB Preservation Corridor. | |
| AAB/23/2021-22 | Ms Wai Chan, Kathy (陳瑋女士) | The proposed pre-construction archaeological survey and an AWB for Outlying Islands Sewerage Stage 2 – Lamma Village Sewerage Phase 2, Package 2 (the Sewerage Project) are initiated by the Drainage Services Department. The objective of the pre-construction archaeological survey is to ascertain if there is any associated kiln furniture and associated archaeological materials in the area of Kiln K1 and Area B according to the recommendations of the Archaeological Baseline Review Report for the Sewerage Project. Appropriate protection measures for any identified archaeological remains would be recommended. Based on the results of review of the Preliminary Environmental Review for the Sewerage Project, the AWB will be conducted at the selected project areas | Fieldwork commenced in July 2022 and is underway. |

| | | | |
|----------------|----------------------------|--|--|
| | | in Long Tsai Tsuen and Hung Shing Ye so that appropriate actions would be undertaken when archaeological materials are identified in the course of construction works. | |
| AAB/23/2021-22 | Mr Wang Wenjian (王文建先生) | To conduct an archaeological survey for Upgrading of Deep Bay Road – Investigation. This survey is initiated by the Highways Department. The Preliminary Environmental Review for Upgrading of Deep Bay Road identified archaeological potential areas and recommended archaeological field works, including survey and survey-cum-rescue excavation. The objective of the archaeological survey is to initially identify the presence and extent of any archaeological remains on government land within the works boundaries along the current Deep Bay Road. Based on the results of the proposed archaeological survey, any adverse impact of the project to the archaeological potential within or in the vicinity of the project area will be assessed and, if necessary, further appropriate mitigation measures will be recommended. | Fieldwork was completed in September 2022. The final report was agreed by AMO in March 2023. |
| AAB/23/2021-22 | Mr Ng Chun Lam (吳震霖先生) | To conduct an AWB for Kai Tak Development Stage 5B Infrastructure Works at the former North Apron Area initiated by CEDD. While the Roundabout Area of the Olympic Avenue was highly disturbed by previous construction works, the AWB will be | Construction works for the AWB commenced in November 2022 and are in progress. |

| | | | |
|----------------|----------------------------|---|--|
| | | conducted during the construction phase of the development at the locations which have not been disturbed in previous underground works. | |
| AAB/26/2021-22 | Dr. Li Long Lam (李浪林博士) | To conduct an archaeological survey for Agreement No. CE 20/2021 (CE) First Phase Development of the New Territories North – San Tin / Lok Ma Chau Development Node – Investigation initiated by CEDD. The objective of the archaeological survey is to gather useful archaeological information at this stage in order to provide an Archaeological Impact Assessment (AIA) for the EA. The archaeological survey will identify if there are any significant cultural layer or archaeological features within the Licence Area, in order to assess potential archaeological impacts that may arise from the development. Where significant archaeological remains are identified, appropriate mitigation measures will be proposed in the AIA. | Fieldwork was completed in December 2022. The final report is under preparation. |
| AAB/26/2021-22 | Ms Julie Van Den Bergh | The AWB at Tung Wan on Cheung Chau is for the construction of Pressure Management and District Metering Installations of the Water Supplies Department. The AWB was recommended by the HIA report of the same project. The purpose of the AWB is to monitor construction excavation works at identified locations and record evidence of archaeological materials, features or deposits if found; and to recommend mitigation measures, in | Upon the expiry of previous licence, a new licence was obtained in November 2022 for the remaining archaeological work. Fieldwork schedule is to be confirmed. |

| | | | |
|----------------|---------------------------|---|--|
| | | agreement with AMO, in case of the discovery of significant archaeological findings. It is an ongoing programme but one of the works location is changed. It is prudent to undertake an AWB for the relocated work sites within Tung Wan Site of Archaeological Interest (SAI), Cheung Chau. | |
| AAB/26/2021-22 | Mr Ng Chun Lam (吳震霖先生) | To conduct an archaeological survey at Portion 1a and 8b of the Kwu Tung North New Development Area for the project of Kwu Tung North New Development Area Phase 1: Site Formation and Infrastructure Works under contract No. ND/2019/01 initiated by CEDD. The purpose of the archaeological survey is to evaluate the archaeological potential of the survey area for AIA. According to the result of the archaeological survey, mitigation measures will be proposed if necessary. Since the licence for the archaeological survey expired in August 2022, Mr Ng applied for the renewal of licence. The licence was renewed in November 2022 for continuing to carry out the survey. | Fieldwork was completed in November 2022. The archaeological report is under preparation. |
| AAB/26/2021-22 | Ms Julie Van Den Bergh | To conduct an archaeological review of Further Archaeological Fieldwork and ARE for Proposed Comprehensive Residential And Recreational Development including Government, Institution or Community Facilities with Minor Relaxation of GFA and Building Height Restriction at Tai Po Town | Owing to the death of Mr Steven Ng Wai Hung in August 2020, the licensed archaeologist, Ms Julie Van Den Bergh has taken over the archaeological project and has been granted a licence in November 2022 to complete it. |

| | | | |
|----------------|----------------------------|--|--|
| | | Lot 157, Various Lots in D.D.165, 207 and 218 and Adjoining Government Land, Sai Sha, Shap Sz Heung, New Territories. | |
| AAB/30/2021-22 | Dr. Li Long Lam (李浪林博士) | To conduct an ARE, archaeological survey-cum-excavation and AWB at Tung Chung Valley for Tung Chung New Town Extension – Site Formation and Infrastructure Works at Tung Chung Valley, Phase 1 initiated by CEDD. The objectives of the archaeological works is to survey and record the archaeological remains, if any, in the project area. Appropriate mitigation measures will be recommended and implemented if necessary. | Fieldwork commenced in January 2023 and is underway. |
| AAB/31/2021-22 | Ms Julie Van Den Bergh | To conduct an archaeological field survey for Agreement No. CE 39/2021 (CE) Site Formation and Infrastructure Works for Public Housing Developments at San Hing Road and Hong Po Road, Tuen Mun initiated by CEDD. The objective of the archaeological field survey is to confirm whether the proposed development area has any Song and Ming dynasties as unearthed in 1998 and/or other archaeological relics. Should significant archaeological findings be discovered, appropriate mitigation measures will be recommended for agreement by AMO. | Fieldwork schedule is to be confirmed. |

| | | | |
|---------------|----------------------------|---|--|
| AAB/3/2023-24 | Dr. Lee Man Hoi (李文愷博士) | To conduct excavation and search for fossils in the areas of sedimentary rocks and soils within Hong Kong on behalf of the Department of Earth Sciences of The University of Hong Kong for teaching and research purposes. | Fieldwork schedule is being drawn up by applicant. |
| AAB/3/2023-24 | Dr. Li Long Lam (李浪林博士) | To conduct an archaeological survey for an AIA for the EIA Study for the Remaining Phase Development of the New Territories North (NTN) – Planning and Engineering Study for NTN New Town and Man Kam To – Investigation. | Fieldwork schedule is being drawn up by applicant. |
| AAB/3/2023-24 | Mr Ng Chun Lam (吳震霖先生) | To conduct an archaeological rescue excavation and an archaeological survey-cum-excavation for the proposed land exchange for Tung Chung DD1 Lot 2991 s.C & s.E initiated by Forestside Limited. The objectives of the archaeological works are to implement the mitigation measures recommended in the approved EIA report of Tung Chung New Town Extension (Application No.: EIA-233/2015) due to the proposed school development at Tung Chung site to support the land exchange application and prior to commencement of the construction works in accordance with AMO's comment on the General Building Plan submission to the Buildings Department. Appropriate mitigation measures will be recommended for consideration of AMO and implemented, if necessary. | Fieldwork commenced in April 2023 and is underway. |

| | | | |
|---------------|----------------------------|--|--|
| AAB/3/2023-24 | Mr Ng Chun Lam (吳震霖先生) | To conduct an AWB for Proposed Temporary Transitional Housing and Ancillary Facilities for a Period of 3 Years in “Residential (Group C)” Zone, Various Lots in D.D. 105 and adjoining Government Land, Ngau Tam Mei, Yuen Long initiated by Melody Gain Limited and Clanville Development Limited. An application for permission for the proposed development under section 16 of the Town Planning Ordinance was approved by the Town Planning Board (TPB). As part of the approval conditions for the project, the project proponent is required to submit an AWB Proposal for the construction works to be carried out within the Mai Po SAI to AMO and TPB for agreement before carrying out the AWB. The objectives of the AWB are to implement the appropriate mitigation measures agreed for construction works to be carried out within the Mai Po SAI to fulfil the approval conditions of the project in relation to the archaeological aspect. | Fieldwork commenced in March 2023 and is underway. |
| AAB/3/2023-24 | Dr. Li Long Lam (李浪林博士) | To conduct an archaeological survey for an AIA for the EIA Study for Northern Link initiated by MTRC L. The objectives of the proposed archaeological survey are to identify any significant cultural layer(s) or archaeological features within the proposed licence area so as to assess the potential archaeological impacts that may arise from the development. Where significant archaeological | Fieldwork commenced in April 2023 and is underway. |

| | | | |
|---------------|----------------------------|---|--|
| | | remains are identified, appropriate mitigation measures will be proposed in the AIA as appropriate for consideration by AMO. | |
| AAB/4/2023-24 | Dr. Li Long Lam (李浪林博士) | To conduct an archaeological survey for an AIA for the Development of Tuen Mun Town Lot No. 467 in So Kwun Wat, Tuen Mun initiated by Winjoy Limited. The purpose of the proposed archaeological survey is to identify if there are any significant cultural layer or archaeological features within the project area in order to assess potential archaeological impacts that may arise from the development. Where significant archaeological remains are identified, appropriate mitigation measures will be proposed in the AIA as appropriate. | Fieldwork schedule is to be confirmed. |
| AAB/4/2023-24 | Dr. Li Long Lam (李浪林博士) | To conduct an AWB for DSD Contract No. DC/2020/07 Tuen Mun North Village Sewerage at Po Tong Ha and Siu Hang Tsuen, Tuen Mun recommended by the “Agreement CE 38/2006 (DS) – Tuen Mun Sewerage Investigation, Design and Construction - Final Proposal for the Archaeological Survey (Issue 2)” to monitor, identify and record any cultural remains if discovered within the project area in the course of excavation works; and recommend appropriate mitigation measures if necessary in agreement with AMO. | Fieldwork schedule is to be confirmed. |

| | | | |
|---------------|----------------------------|---|--|
| AAB/4/2023-24 | Mr Ng Chun Lam (吳震霖先生) | To conduct an AWB for the Elderly Home Development in Lam Tei, Tuen Mun recommended by the feasibility study for the development project initiated by Pok Oi Hospital to monitor, identify and record cultural remains if discovered within the project area in the course of excavation works; and recommend appropriate mitigation measures if necessary in agreement with AMO. | Fieldwork schedule is to be confirmed. |
| AAB/4/2023-24 | Ms Julie Van Den Bergh | To conduct an archaeological survey for Agreement No. CE 4/2022 (HY) Upgrading of Nim Wan Road (North) – Investigation, Design and Construction initiated by the Highways Department. The archaeological survey, which was recommended in the Preliminary Environmental Review for Agreement No. CE 4/2015 (HY) West New Territories Landfill – Study of Access (Upgrading of Nim Wan Road and Deep Bay Road) – Feasibility Study, aims to identify the archaeological significance and impact of the project area, assess the archaeological impact and recommend the follow up action, particularly on the lands issue that had limited the area for the proposed archaeological works and the potential for proposed further archaeological works after land resumption. | Fieldwork schedule is to be confirmed. |
| AAB/4/2023-24 | Mr Wang Wenjian (王文建先生) | To conduct further archaeological survey, archaeological rescue excavation and AWB for Tung Chung New Town Extension – Site Formation | Fieldwork schedule is to be confirmed. |

| | | | |
|--|--|---|--|
| | | and Infrastructure Works at Ma Wan Chung initiated by the CEDD. The purpose of the archaeological works is to assess portions of known archaeological sites which will be directly impacted by the proposed works, assess the archaeological potential of areas near known archaeological sites and identify any unknown archaeological sites affected by the proposed works. Appropriate mitigation measures will be recommended if necessary. | |
